Meeting focus

Strengthening evidence and action for a patient- & family-centered care culture

Meeting goals

1. *Characterizing perspectives on care culture.* Explore how perspectives on care culture vary by stakeholder—patients and families, clinicians, and systems.
2. *Measuring progress.* Examine approaches for assessing and reporting results of initiatives to improve patient and family involvement in quality, evidence, and value.
3. *Building the evidence base.* Consider the state of the evidence base on the effectiveness of patient and family initiatives to improve care outcomes and quality.
4. *Developing tools.* Discuss activities, trends and prospects for tools that assist and improve the results of partnered decisions by patients and clinicians.
