Notes:
1. The Host Group was composed of the IOM, the Rockefeller Foundation and the World Bank, with input from WHO. It convened multiple experts and invited input on the design and initial draft architecture of the initiative drafted by IOM (time bound initiation phase).
2. Following the initiation phase, the Host Group was replaced by an International Oversight Group, made up of several sponsors of the initiative and other relevant stakeholders. This group nominated commissioners for the Independent Commission and finalized the statement of task for the Commission. The IOM will function as the Secretariat and provide project management throughout the whole of the initiative.
3. The Independent Commission is geographically/demographically diverse and includes the needed expertise. Many of the commissioners are “dual-hatted” and also serve as members of the workshop planning committees.
