

Potential EvGen Collaborations

Infrastructure Requirement	Data to Knowledge		Knowledge to Practice	
	Issue	Collaboration	Issue	Collaboration
<i>Digitized Data & Information</i>	Clinical data quality	Health Systems, IT Developers, Patient Groups	Accessibility to computable, evidenced-based CDS	Health Systems, IT & Guideline/CDS Developers, Professional Societies
<i>Standards & Services</i>	Standards to support services to find and donate data, consent and enroll trial patients	SDOs, Computer Scientists, IT Developers, Patient Groups, Health Systems, Pharma	Services to access standardized, computable CDS	Health Systems, IT Developers
<i>Policies & Governance</i>	Do we need inter-network policies and governance?	Existing Research Networks	Need to decide how to curate “trustworthy” CDS	Health Systems, IT & Guideline/CDS Developers
<i>Sustainability</i>	Is EvGen a public good? If so, how should it be financed?	A public/private collaboration ?	Long term support for the infrastructure	A public/private collaboration ?
