Patient-Centered Organizational Culture... is it sustainable?

© Planetree 2013

“... we found that 18 months after implementing our patient-centered bedside shift report, that it was only happening 50% of the time, and never on weekends...”

“...with all the hard work focused on improving the patient experience in healthcare over the past decade, why did only 251 hospitals get five stars on Medicare’s new rating...”

“...we put a Patient & Family Partner Council together for our multi-specialty practice to meet 2014 NCQA standards, but we couldn’t keep them interested, and after a few meetings it petered out...”

PLANETREE

We looked to a few of the experts...

© Planetree 2013

- Leaders of CMS 5  hospitals
- International Patient & Family Partners Council
-  Planetree Designated Healthcare Organizations w/10+ yrs
- Partnership for Patients PFE Dimensions

How does establishing a patient-centered culture benefit:

- Employees
- Clinicians
- Customers/Patients and Families

How do you effectively embed a sustainable patient-centered culture?

- Infrastructure
- Practices
- Measurement

Patient-Centered Care is not another 'thing' to do, you have to integrate it into all other efforts

© Planetree 2013

Define patient-centered care as a core element of clinical quality, not as separate customer experience activities

Make patient-centeredness a goal of all your other priorities

Build Supportive Infrastructure

© Planetree 2013

How do you effectively embed a sustainable patient-centered culture?

- **Infrastructure**
 - Practices
 - Measurement

PLANETREE

I.A: A **multi-disciplinary task force**, including patients/residents and family members, is established to oversee and assist with implementation and maintenance of patient-/resident-centered practices. Active participants on the task force include a mix of non-supervisory and management staff and a combination of clinical and non-clinical staff. The group meets regularly (every 4-6 weeks) on an ongoing basis.

© Planetree 2013

I.B: A **patient-/resident-centered care coordinator** or point person is appointed who is able to commit the time required to champion related activities on an ongoing basis.

I.C: **Periodic focus groups** are conducted on-site by qualified, independent vendor

I. Structures and Functions Necessary for Culture Change

Multi-disciplinary task force, inclusive of patients and family members, to oversee implementation of patient centered practices & priority-setting

Dedicated champion(s) responsible for PCC activities

Periodic focus groups/listening sessions

Patient and Family Partnership Council

Quarterly meetings (at a minimum six times a year) and access to decision-makers, or some other effective mechanism to obtain regular input from patients/residents and community. Participation is representative of the community served.

I.F: Leadership exemplifies approaches that motivate and inspire others, promote positive morale, mentor and enhance performance of others, recognize the knowledge and decision-making authority of others and model organizational values, as demonstrated in focus groups with staff, employee experience survey results and the adoption of **transformational leadership practices**.

Patient-Preferred Practices

© Planetree 2013

How do you effectively embed a sustainable patient-centered culture?

- Infrastructure
- **Practices**
- Measurement

PLANETREE

Listen to the voice of the patient and implement preferred practices & innovations with their involvement

© Planetree 2013

- All settings:
 - Family care partners
 - Shared decision-making
 - Empathy & communication skills training
- In-patient settings:
 - 24/7 patient-directed visitation
 - Patient & Family Centered bedside shift report
 - Transition plan with patient & family input

Measurement
