Colleagues: Thank you for your involvement in the Value Incentives and Systems Innovation Collaborative (VISIC), a convening activity under the auspices of the National Academy of Medicine (NAM) Leadership Consortium for a Value & Science-Driven Health System.

**NAM MEETINGS OF INTEREST TO COLLABORATIVE PARTICIPANTS**

- **Procuring Digital Interoperability for Health Care**—focus: driving healthcare interoperability through collaborative procurement strategies (January 30, 2018; [event page](#)).
- **Better Care for High-Need Patients Webinar Series**—focus: to advance insights and perspectives on how to better manage the care of the high-need patient population (February 16, 2018 - April 25, 2018; [event page](#)).
- **Building the Evidence Base for Improving Health Care Symposium**—focus: contributions of health services research (HSR) to effectiveness and efficiency in health and health care (February 26 & 27, 2018; [event page](#)).
- **Care Culture and Decision-Making Innovation Collaborative Meeting**—focus: community health needs assessments as a means to activate communities in co-creating agendas to promote health and well-being. (May 17, 2018; [summary](#)).
- **Evidence and the Individual Patient: Understanding Heterogeneous Treatment Effects Meeting**—focus: inherent limitations of using group data to guide treatment decisions for individuals (May 31, 2018; [event page](#)).
- **Clinical Effectiveness Research Innovation Collaborative Meeting**—focus: establishing a shared vision for generating stakeholder support and demand for data sharing, linkage, and use for a continuously learning health system (June 11, 2018).
- **Digital Learning Collaborative Meeting**—focus: patient ownership of health data in a learning health system (June 28, 2018; [event page](#)).

**COLLABORATIVE PROJECTS STEWARDED BY VISIC**

- **Health System Financing that Rewards Results**: Guided by a steering committee, the NAM is facilitating development of a Special Publication presenting a roadmap for accelerating the move toward a health care delivery and financing model that rewards value and improved population health (for more information, contact Henrietta A. Osei-Anto, Senior Program Officer, at HOsseiAnto@nas.edu).
- **Vital Signs: Core Metrics for Health and Health Care Progress**: The NAM is working with key field leaders to operationalize the core metrics presented in the 2015 IOM publication *Vital Signs: Core Metrics for Health and Health Care Progress*. The refined measures will be presented in a NAM publication to be released late 2018, with related activities highlighted through an ongoing NAM webinar series. For more information, Henrietta A. Osei-Anto, Senior Program Officer, at HOsseiAnto@nas.edu.
- **Improving Care for High-Need Patients: Online Resource Hub**: Following the release of the NAM Special Publication *Effective Care for High-Need Patients: Opportunities for Improving Outcomes, Value, and Health*, the NAM developed new resources to help improve care for high-need patients. Resources available include patient and caregiver testimonials, opportunities for action for a multitude of stakeholders, and highlights from our Special Publication. For more information, visit NAM.edu/HighNeeds.

**RECENT NAM PUBLICATIONS**

- **Effective Care for High-Need Patients**: An NAM Special Publication resulting from stakeholder partnership that proposes stratifying, targeting, and tailoring team-based care according to functional clusters of the high-need population. Related resources, such as issue briefs with target actions for stakeholder groups are available here.
- **Optimizing Strategies for Clinical Decision Support**: An NAM Special Publication which summarizes expert discussions of the potential of clinical decision support to transform care delivery and opportunities to address the barriers to realizing the full benefits of CDS-facilitated value improvement. A full PDF download is available here.

**GET INVOLVED**

- **Systems Approaches to Improve Patient Care by Supporting Clinician Well-Being**: An ad hoc committee established under the auspices of the National Academies of Sciences, Engineering, and Medicine is conducting a consensus study to examine the scientific evidence regarding the causes of clinician burnout as well as the consequences for both clinicians and patients, and interventions to support clinician well-being and resilience. The committee will hold their first public session on October 1, 2018 in Washington, DC. Please sign up to receive information about registration.
