

NATIONAL ACADEMY OF MEDICINE

LEADERSHIP CONSORTIUM
for
A VALUE & SCIENCE-DRIVEN HEALTH SYSTEM

Care Culture and Decision-making Innovation Collaborative

January 17th, 2019
National Academy of Sciences Building
Room 125
2101 Constitution Avenue, NW | Washington, DC

Meeting Focus: *Convening of the NAM Working Group on Technologies to Enhance Person, Family, & Community Activation*

Motivating questions:

1. **Purposes:** What is the potential for technologies to advance equity and the empowerment of persons, families, and communities in health and healthcare? What is the potential for technologies to tactically enhance the equitable personalization and quality of medical decisions?
2. **Practices:** Which examples best illustrate transferable lessons on how to achieve success and avoid harm?
3. **Strategies:** What core tenets and resulting interdisciplinary actions are necessary to build a future environment of equitable, technology-enabled, participatory health and healthcare?
4. **Improvements:** What gaps and issues need to be urgently acted upon to avoid harm and achieve progress, and what stakeholders or disciplines must be involved in this action?

Outcomes anticipated: Engagement of the full range of front-line leadership, resources, and partnerships for the creation of an equitable health system in which technology enables seamless engagement of patients, families, clinicians, and community resources as partners on behalf of transformative progress in health and health care.

8:30 am **Coffee and light breakfast available**

9:00 am **Comments & meeting overview from Chair**
