NATIONAL ACADEMY OF MEDICINE

CARE CULTURE AND DECISION-MAKING INNOVATION COLLABORATIVE

Winter 2019 Update

Colleagues: Thank you for your involvement in the Care Culture and Decision-Making Innovation Collaborative (CCDmIC), a convening activity under the auspices of the National Academy of Medicine (NAM) Leadership Consortium for a Value & Science-Driven Health System.

NAM MEETINGS OF INTEREST TO COLLABORATIVE PARTICIPANTS

• Leadership Consortium Members Meeting—focus: increasing consolidation in the health care industry and implications for care culture, value, and evidence in a continuously learning health system. (September 13, 2018; summary)

• Digital Learning Collaborative—focus: convening of the NAM Artificial Intelligence (AI) & Machine Learning (ML) in Health Care Working Group and external experts to discuss a draft NAM Special Publication describing the promise, development, and deployment of AI/ML models to improve health. (January 16, 2019; event page)

• Care Culture and Decision-Making Innovation Collaborative—focus: convening of the NAM Working Group on the Community Health Needs Assessment and Improvement Process: Principles & Practices to discuss a draft NAM Special Publication. (December 6, 2018; summary)

• NAM Action Collaborative on Clinician Well-Being and Resilience—focus: establishing clinician well-being as a national priority. (May 29, 2019; event page)

• Clinical Effectiveness Research Innovation Collaborative—focus: stakeholder convening for the NAM Generating Support and Demand for Health Data Sharing, Linkage, and Use initiative to review the progress and develop principles, approaches, and strategies for addressing barriers to data sharing, linkage, and use. (February 7, 2019; event page)

COLLABORATIVE PROJECTS STEWARDED BY CCDmIC

Collaborative projects: 1) identify issues of common interest and marshal needed leadership; 2) develop tools and networks needed for progress; and 3) develop joint leadership possibilities through individually-authored Perspectives papers:

• Community Health Needs Assessments Principles & Practices: An NAM Working Group – an ad hoc working group is writing a special publication to describe the emerging principles of the community health improvement process; how these principles can be used to further the goals of health equity; and opportunities for transformative assessment and improvement in population health that include perspectives from all stakeholders, including health systems, public health departments, and the community.

• Technologies to Enhance Person, Family, & Community Activation: An NAM Working Group – an ad hoc working group comprised of leadership from key stakeholder sectors to identify, prioritize, and advise on key issues related to the potential of technologies to make care more patient-centered, equitable, accessible and convenient for patients, while enhancing the quality of medical decisions. The working group is in the process of writing three NAM discussion papers on related sub-topics. Summary of a recent meeting of this group is available here.

• Assessing Community Engagement in Health & Health Care Measurement Development Project— with support from the Robert Wood Johnson Foundation, this collaborative project seeks to review existing measures for evaluating community engagement in health care program and policy decision-making at the healthcare system, local, state, and nation levels and to establish a process for identifying an indicator or set of indicators that can be used to measure community engagement in a wide range of settings.

• Patient and Family Engaged Care: An Essential Element of Health Equity— building on an NAM Perspectives Harnessing Evidence and Experience to Change Culture: A Guiding Framework for Patient and Family Engaged Care and discussions at CCDmIC meetings, a group of key thought leaders will assess issues and explore the culture change elements necessary to meaningfully engage patients, families and communities to co-create health equity and reduce health and health care disparities.

COLLABORATIVE PROJECTS UNDER CONSIDERATION FOR CCDmIC

Collaborative projects: 1) identify issues of common interest and marshal needed leadership; 2) develop tools and networks needed for progress; and 3) develop joint leadership possibilities through individually-authored Perspectives papers:

• Executive incentives for reducing disparities. Explore the use of health care executive compensation incentives to reduce community health disparities.

• Person, family and community activation for better care, better value and better health. Develop an NAM initiative to support activation of individuals, families, and communities as effective health and health care change agents by addressing three key areas: access to the evidence base to guide strategies; collaboration to apply evidence; and cultures and policies that are supportive and facilitative of their engagement.

• Advancement of patient and family engaged care. Develop common PFEC action and research agenda with a crosswalk of PFEC standards and measures and determine ways to digest the framework into messages for various stakeholders.

• Assessment of community values. Using Vital Signs framework, explore metrics for assessing community values and community engagement.

• Improved networking for innovations. Assess landscape of proven community engagement models and explore opportunities for better networking so information transfer about successful models is accelerated.

STAYING ENGAGED WITH CCDmIC

The next CCDmIC meeting will take place June 19, 2019 in Washington, DC. If you would like to join via videoconference, contact Fasika Gebru (fgebru@nas.edu). Please be in touch for information, to indicate interest in participating in an activity, or to offer any comments with Anna Cupito, (ACupito@nas.edu).
