Redesigning the Clinical Learning Environment

Charlee Alexander
Director, Action Collaborative on Clinician Well-Being and Resilience

May 29, 2019

National Academy of Medicine
Action Collaborative on Clinician Well-Being and Resilience
Action Collaborative Goals

• Raise visibility of clinician burnout, depression, moral injury, and suicide

• Improve understanding of challenges to clinician well-being

• Advance evidence-based, multidisciplinary solutions that will improve patient care by caring for the caregiver
Working Group Participants

~65 participants representing:
• Medicine, nursing, pharmacy, dentistry
• Professional societies and membership organizations
• Government agencies
• Health IT vendors
• Large health care centers
• Payers
• Researchers
• Trainees and early career professionals
• Patient and consumer perspectives
Working Groups (2017-2018)

1. Research, Data, and Metrics
2. Conceptual Model
3. External Factors and Work Flow
4. Messaging and Communications
Working Groups (2019-2020)

1. Leadership Engagement
2. Breaking the Culture of Silence
3. Organizational Best Practices and Metrics
4. Workload and Workflow: Administrative tasks and the EHR
5. Post-2020 Sustainability Planning
6. Action on Consensus Report Recommendations
Gender-Based Differences in Burnout: Issues Faced by Women Physicians

By Kim Templeton, Carol A. Bernstein, Javeed Sukhera, Lois Margaret Nora, Connie Newman, Helen Burstin, Constance Guille, Lorna Lynn, Margaret L. Schwarze, Srijan Sen, Neil Busis

Recognizing gender-related differences can help design successful strategies to improve physician well-being and to identify, treat, and prevent burnout.

nam.edu/Perspectives
#ClinicianWellBeing
An ad hoc committee will examine the scientific evidence regarding the causes of clinician burnout as well as the consequences for both clinicians and patients, and interventions to support clinician well-being and resilience. The committee will examine components of the clinical training and work environment that can contribute to clinician burnout in a variety of care settings, as well as potential systems interventions to mitigate those outcomes. The committee will identify promising tools and approaches to support clinician well-being, identify gaps in the evidence base, and propose a research agenda to address areas of uncertainty.

Project website:
Meeting Objectives

• Explore what we value as health care professionals and how to change culture by focusing on human connection along with productivity and efficiency to do the best for our patients and ourselves.

• Elevate areas of agreement around redefining well-being, identity formation, and professionalism as clinicians embracing team-based care with a culture of respect.

• Consider the clinical learning environment as an ecosystem that includes interprofessional health students, trainees, and practitioners across disciplines and specialties.

• Highlight drivers of challenges to clinician well-being in the clinical learning environment and propose systems-level solutions for improving well-being including leadership approaches.

• Emphasize the tension and linkage between the learning and working environment.

• Use an appreciative inquiry philosophy to create environments and cultures that nurture discussions throughout the developmental journey of a clinician and across clinical professions.
