

Cairo Neuropsychiatric clinic is a leading organization in the field of mental and medical health services with giving an importance for the impact of climate change on health specially its impact on health care providers as the impact of climate change was obviously attracted so many health care professionals worldwide specially post COVID pandemic.

For this and so many reasons like increasing psychological disorders in relation to the climate change worldwide & specially in developing country like Egypt , that's why our center gave an attention for this crisis.

One of the roles that our center is making is the psycho education for our clients and health professionals about the importance of knowing the impact of climate change on health, specially Egypt will receive the COP27 this year in sharm Elshiekh in south Sinai

It's an honor for our center to be part of this collaborative with all its commitments towards the impact of climate change on health & spreading this awareness in our community
