

**National Academy of Medicine
2025 Climate and Health Summit**

Overview: The National Academy of Medicine (NAM) will host its second annual Climate and Health Summit on Tuesday, April 22. This full day event will include panels featuring top climate and health experts and offer insights into innovative and exemplar climate and health programs from both NAM and our partners within the Climate Grand Challenge. This convening is a unique offering for the community of climate and health leaders from across the United States to come together to learn from each other, find ways to engage with NAM’s work, and find reinforcement that their work truly impacts the health of everyone, everywhere.
